

# Nicolai Harms

## Fullstack developer

### About me

I am an ambitious fullstack developer with professional experience in WordPress, Umbraco, Sanity, Typescript and modern javascript frameworks. My studies have provided me with solid insight into contemporary web technologies and frameworks, strengthening my skills in both frontend and backend development. I am passionate about creating functional and user-friendly solutions and am currently seeking an workspace where I can further develop my competencies.

### Work Experience

### Education

- **Web Development – Professional Bachelor**

User-Centered Application Development  
January 2026

- **Multimedia designer**

- **Frontend developer – intern**

Kruso – 1119 Copenhagen

August 2025 – December 2025

During my internship at Kruso, I worked on various solutions with a primary focus on Umbraco and Sanity. I gained hands-on experience with modern frameworks and collaborated across teams with other developers on ongoing projects. Additionally, I used pull requests to ensure code quality, reported daily to project managers, and actively participated in meetings and check-ins.

- **Junior frontend developer**

Brand By Hand – 8230 Åbyhøj

October 2023 – June 2025

During my multimedia design internship, I worked at Brand by Hand, where I was later hired part-time. At Brand by Hand, I developed websites in WordPress – using PHP for larger projects and Elementor for smaller ones. I was also responsible for fixing issues on existing websites and implementing additional functionalities. In addition, I communicated directly with clients regarding deadline alignment and time estimations.

- **Waiter / Bartender / Seater / Floor manager**

Madklubben Aarhus – 8000 Aarhus

May 2021 – 2024 January

At Madklubben Aarhus, there is hardly a single role I haven't learned, and before starting my studies, I was already involved in the management team. I gained strong leadership skills and experience in handling complex tasks as part of a team, as well as responsibility for closing operations at the largest restaurant in Jutland.

- **Webshop Administrator & Warehouse Assistant**

Abcleg – 7120 Vejle

2018 – 2020

At Abcleg, I was introduced to the systems behind their webshop, which in this case was Magento. I was responsible for updating and maintaining the products, along with all related tasks. I also helped pack items for customer orders.
